

For Banks

"We normally have three weeks to prepare for exams but finished with two weeks to spare. With SOTEC, we were able to automatically generate the printed reports we needed and send them off to the FDIC Examiner, who actually complimented us on the level of detail provided in the reports. To manually create these reports would have required a full-time person dedicated to compiling the data - a luxury our budgets won't allow."

*Paula Chesbrough,
VP of Information Technology
Eagle Bank*

- Are you struggling with privacy and security compliance obligations for your next bank exam - whether it's FDIC, Gramm-Leach-Bliley (GLBA) or state-related?
- Want to simplify the preparation for your next bank exam?
- Want an easier way to document the performance and availability of your internal network resources?
- Want to ensure that your branches are communicating with the ATM network and are fully available?
- Want to improve response time of "lifeblood" applications like HR, e-mail and General Ledger?

We can help. SOTEC Technical Solutions fulfills the reporting requirements developed by FDIC, FRB, OCC, NCUA and OTS for bringing your infrastructure in compliance with GLBA. Using SOTEC software, you can easily automate the preparation of time-consuming asset and security reports.

The Industry's Simplest IT Management Solution

With SOTEC's software, you can proactively manage network devices, WAN connections, critical servers and vital applications across a variety of departments and branches - all from a single Web-based Dashboard. SOTEC installs in 1-3 days and because we understand that you have better things to do than manage your management software, we handle all patches and administration for you at no extra charge.

Network, system and application reports include:

- Faults
- Assets
- Performance
- Security intrusion monitoring & vulnerability scanning
- Patch assessment & remediation
- Latency
- Availability
- CPU, memory & disk utilization
- Much more

How Our Customers Use Our Software

Eagle Bank, Bank of Newport, Alliant, Carver State Bank and Country Bank for Savings are just a few happy customers who are utilizing SOTEC's IT management and security software to accomplish the following goals:

- Automate the identification, prioritization and mitigation of Windows patch vulnerabilities
- Significantly reduce the costs and time associated with audit preparation
- Alert on systems hosting critical internal processes such as e-mail, payroll, General Ledger and HR
- Track IT assets by IP address and software image
- Increase visibility into slow service issues while proactively identifying causes of delay
